

Parrott TalkPro™ Xpress

The Speech Recognition Headset

The Parrott TalkPro Xpress is specifically designed for applications that require superior microphone performance, especially speech recognition.

TalkPro™ Xpress Benefits

- Superior noise canceling microphone for serious speech recognition users
- Durable components for long headset life
- Flexible “gooseneck” microphone boom stays in position
- Left or right side microphone placement
- Adjustable headband won't snag hair
- CD quality playback for enjoyable sound
- Ear cushion slightly cupped for comfort and to enhance sound
- All day wearing comfort
- Attractive translucent graphite color
- 10ft cord for easy mobility
- VXI's unconditional 2-year warranty

Microphone delivers unsurpassed performance

The Parrott TalkPro Xpress incorporates a high performance Gentex noise-canceling microphone to achieve higher speech recognition accuracy.

Improved version of the “Original”

The Parrott TalkPro Xpress headset is an enhanced version of VXI's highly successful Parrott 10-3 headset, which set the standard worldwide for exceptional sound clarity and accuracy in use with speech recognition software programs.

Easy to Use

Simply plug the Parrott TalkPro Xpress into the computer's soundcard and begin right away!

For laptop computers or computers with older or non-standard sound cards, the Parrott TalkPro is also available with the VXI Parrott Translator™, which provides power to laptops and guarantees sound card compatibility. The Xpress model does not have a Translator.
